

Dark and Vengeance

A drink created by BE-37 during his time as a bar tender aboard the ISD II Hammer the Dark and Vengeance is a drink based on Abraxian Rum and an ale synthesised from Corellian Spice Root.

Frequently garnished with Ithorian coriander leaves and infused with a sweet syrup it is rumoured to be a favourite drink of the Hammers Command Crew.

When made correctly the sweet syrup can be replaced with a rare Alderanian black honey, this gives the drink its characteristic dark colour and plays to its name. It's also possible the name relates to BE-37's other job as bouncer and those unfortunate enough to interrupt him whilst mixing.
